EasyVisitorPass Variants

Web

Windows

Kiosk

Self Service via Touch Screen Kiosk

EasyVisitorPass is compatible to touch screen devices and can deploy touch screen kiosk for self registration of visitors

Visitors can enter their information, select purpose of visitor, do the photo capture.

Kiosks can be further attached to printer to print the visitor pass.

All these options greatly reduces time spent on visitor registration and provides self service for quick visitor movement without any delays.

Why EasyVisitorPass?

Product Values

- Efficient Solution to keep a track of visitors in/out flow to automate secure automation of visitors.
- Quick and easy production of Visitor Pass with photograph, visitor and host information
- Real-time checks and alerts to avoid security lapses
- Real – time reporting to get better visibility of visitor's information and their usage of your facility
- Eliminate manual visitor registration process and reduce visitors waiting period
- Easily scalable to work on different platforms such as PC, Kiosk or Tablets

Key Attributes

- Intuitive Visitor Registration process to easily capture all the information about visitors including vehicle no, materials, no of person accompanying, etc.
- Quick generation of visitor pass which can be easily distributed to the visitor for secure entry and exit
- Setup various Security alerts such as SMS, Ping or email based on various locations
- With expected time out for each visitor, highlight visitors who have not checked out after the expected time out
- Integration with business card reader to capture visitor information quickly and eliminate manual errors

Is your lobby or your reception maintaining a manual booklet to sign up visitors ?

Are you able to use that database to understand and define the visitors into vendors, suppliers, customers, and others ?

If the answer is “NO” then EasyVisitorPass (Visitor Management System) is a must to automate the visitor tracking and secure your organization’s premises
